Country Map Interface

- First example of government funded data collection with the OER World Map
- An “OER Germany Map” will be developed
- The “OER Germany Map” can be reused for the Generation of multiple OER Country maps

2. Drei Beispiele

Global digital LIBRARY

The Global Digital Library (GDL) is being developed to increase the availability of high quality mother tongue learning resources worldwide.

The GDL-project is currently in an initial stage; establishing the implementation plan and steering structure and piloting the technical platform.

About the Global Digital Library

The Global Digital Library will expand access to mother tongue (MT) content by providing openly licensed, downloadable materials that allow sharing, electronic use and large scale printing, as well as linking to other sources for those materials.

The initial focus will be on learning resources that can support children's literacy learning. Other learning resources will be included at a later stage.

A A A

Textbook-free degree

With TCC's Z-Degree, here's what you pay for books: Zero.

Did you know that

- Textbook prices have risen 82% in the last decade?
- You might pay hundreds a semester for textbooks?
- Textbooks could be 25% or more of your college costs?

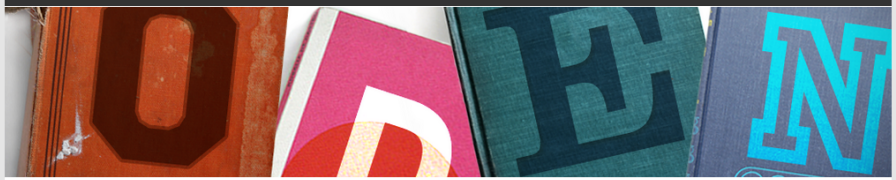

But what if you didn't have to buy textbooks? You could save as much as 25% on the cost of your TCC education.

OpenMed

Opening up Education in South-Mediterranean countries

WELCOME TO OPENMED!

Five partners from Europe and nine from South Mediterranean Countries are working together to widening participation and adoption of **Open Educational Resources (OER)** and Open Educational Practices (OEP) as a bottom-up approach to support the modernisation of the Higher Education sector in **Morocco**, **Palestine**, **Egypt** and **Jordan**.

OpenMed is an international cooperation project co-funded by the Erasmus+ Capacity Building in Higher Education programme of the European Union during the period 15 October 2015 – 14 October 2018. It explores the adoption of strategies and channels that embrace the principles of openness and reusability within the context of South-Mediterranean universities.

The project will also offer the possibility to other universities from Morocco, Palestine, Egypt, Jordan or any other Southern Mediterranean country to join the action as community partners. Stay tuned to know more about the upcoming exciting Open Education adventures between the two shores of the Mediterranean basin!

Strategische Überlegungen

Drei Pfeiler von OER-Initiativen

OERInfo: Phase II & III ?

Projektskizze „OER in der Grundschule“

- Zielgruppe: interessierte Grundschulen
- Content
  - Arbeitsblattkollektionen für Deutsch & Mathe
  - CC 0 lizenziert
  - In leicht zu bearbeitenden Format
  - Print-Unterstützung
- Infrastruktur
  - Editor (z.B. Tutory)
  - Repository
- Know-how: Intensives Training
- Wissenschaftliche Begleitung

OER in der Grundschule: Herangehensweise

- Kontrollierbar / Komplexitätsreduzierend
- Anschlussfähig
- Evolutionär
  - Nicht revolutionär
  - Die Evolution der Bildung des individuums nachzeichnend Bildungsontogenese
  - Offenheit kann Schrittweise erfolgen
- Mit direktem Mehrwert/Erleichterungen für Lehrer!
